

Pluto in Aquarius

Little, powerful Pluto, way out there in the far reaches of the solar system, is symbolic of **purification, regeneration and transformation**. From the perspective of holism, far is like acknowledging that your toes are far from the top of your head. You simply have to adjust your perspective of holism to cosmic proportions, and then you are in the mindset that distance is not necessarily a major factor, just as quantum entanglement suggests, and the interaction of your imagination, intuition, and reasoning intelligence too can evolve to see what it could not quite conceive prior.

Process is a keyword, as is metamorphosis. Death is its dark side, yet subject to the cyclic nature of duality, it is always followed by one kind of rebirth or another. That said, the death process can be and often is difficult. So, when it is someone else's turn, exercise empathy and compassion, as you would secretly pray for when it is yours. What supports us through this phase, which includes deconstruction, decay, and pulverization, is faith - faith in the process, faith that new life follows, and faith that the resurrection includes fresh, energized and inspired enthusiasm to embrace new possibilities.

So, although Pluto often gets a bad rap, we are challenged to embrace its purposeful process as the gift it is. After all, what would it be like if the processes of change and transformation were not operative? Stagnation is high on the list of answers. So, focus your intention to cooperate with its regenerative processes proactively, faithfully, and willingly, since resistance is futile anyway. Yet, in this way, we can each and together contribute to steering the directions of destiny to new experiences, victory, and fulfillment.

Pluto entered Aquarius on November 19, 2024 for the third and final time for this round and remains there transiting through the sign of the Water Bearer **until 2044!** This will prove very impactful for everyone and on a global scale, and is likely to prove challenging, ironically. There are those who idealize notions of modern technology working for us versus against, but can we rely on such optimism? On personal levels, people with planets, angles, and other sensitive points at the first 3 degrees of any sign, but especially those of the Fixed Signs: Aquarius, Taurus, Leo and Scorpio will experience its regenerative and transformational, and at best, purifying impact.

It will take the entire year to achieve 2 Aquarius 43 where it will be on January 1, 2026. Over the course of the year, Pluto will advance to 5 Aquarius 31, and by the end of the year it will be at 4 Aquarius 31 as 2027 begins. So if you have planets **in your Birth Chart in this degree range**, you can expect to undergo transformations in your life, which can bring

about endings, purifications, regenerations and so on. The key is to be aware and cooperate as much as you can.

Pluto invariably has a major effect on our lives at both mass collective and individual levels. When Pluto transits through a sign, it invariably produces a steady flow of transformational change. For example, its transit through Capricorn, the sign of governments since 2008 synchronized with real estate prices increasing by 3 and 4 times, if not more, a housing shortage crisis manifesting as widespread tent cities that continues to this day the world over, a steady emergence of governments the world over exercising more authority the world over. Catapulted by the Covid-19 horror, forced compliance by governments to accept new medical technologies that were not thoroughly tested, resulting in millions losing their livelihoods, businesses and life savings and the casualty count from adverse reactions continues to rise steadily even to this day. In short, governments have lost their prior stature as trustworthy and have revealed severe levels of corruption. Consequently, people are generally much more suspicious of the integrity of governments as we now begin a whole new cycle in Aquarius. Ironically, it is this very reality that is also now pushing us all to become more politically aware and less naïve regarding the promises of politicians.

What is not so well understood is that Pluto is in its “fall” Sign in Aquarius. This means that it does not fare so well... As the sign of humanity, in general, it may be understood that we are about to undergo many changes. Among the more significant themes is the fact that more power and authority has shifted into the hands of private sectors, as with mega corporations and conglomerates, the members of which do not have civic responsibilities and are largely unknown. Positively, these changes will manifest as people come to recognize their common interests more fully and so begin to focus on working together more cooperatively than before.

Uranus, the ruler of Aquarius, still in Taurus until late April 2026 is also in its fall sign, which has synchronized with the steadily advancing economic recession. Positively, when Uranus enters Gemini it will synchronize with a more activated, assertive and productive impulse leading to much-needed economic growth. Uranus will re-enter Gemini again on April 25, 2026 and will then transit through the sign of the twins until late May 3033!

The main outer manifestations with Uranus in Taurus include digital currencies and central bank control, banks owned by private sectors, and restrictive policies placed on farming practices. An observer from another planet might recognize that humanity is at war with itself, and it might also be recognized that there must be various hidden networks at the helm of these unnecessary and perplexing crises.

Aquarius can generally be understood as the sign of humanism and humanitarianism, so it can also be interpreted to be the sign of humanity itself. The Water Bearer image symbolizes the metaphysical understanding that matter itself is, we are, and life when regarded holistically, in its dualistic expression, is comprised of energy, vibration and frequency. We see this understanding and application of technology regarding energy waves everywhere in the world, not least of all the internet and wireless access, Bluetooth, radar, satellite transmissions and so on. The rapid spread and popularization of ancient wisdom, knowledge, and technology as with Sacred Geometry and the increasing acceptance of ancient high civilizations, are all part of this Aquarian Age theme.

Thus, Pluto in Aquarius will likely prove to manifest as a transformation of humanity at the mass collective level between now and 2044 when it enters Pisces.

Describing how this will unfold is not simple and would require an entire book, but we can be certain that humanity in general will undergo processes of deep change and transformation at a global scale over the 20-year period of its transit that is now underway, without any more interruptions.
